NATIONAL RADON SAFETY BOARD ACCREDITED

Charcoal Canisters contain small quantities of activated charcoal. Radon is absorbed onto the charcoal and then measured by counting with a sodium iodide detector. **ORDER NOW**

Check the radon level in your home in just 48 hours!!
Radon has been identified by the EPA as the number two cause of
lung cancer.

Each kit (1 canister) includes instructions on how to test.
You may also call B-aware home inspection and we will walk you
through the test and help you interpret the results.
